Objective

Experience working on flutter apps on my own or with a team to achieve client needs and produce effective apps ready for production

Skills

Flutter, Dart, BLoC state management, SOLID principles, Firebase, GitHub, Restful APIs, Design Patterns, OOP, Data Structures, Algorithms and MVVM

Experience

Freelancer as a Flutter developer | 12/2022 – Present

I'm working as a freelancer for now, I worked on projects like news apps and e-commerce apps, learning apps, and chat apps worked on full projects and use firebase for some apps and worked with another developer responsible for developing the backend.

Education

Tanta University | Tanta, Gharbia

Computers and informatics | 07/2023

Trained with Mega projects company after the 3rd year of my university stage

Projects

Utopia: this was a graduation project with A+ grade I was responsible for programming it I used flutter and firebase on it.

CTE news: An application that publishes news through the admin, the news can contains videos or photos with the ability to comment on it, I develop this app for faculty of Telecom & Electronics in Jeddah.

Courses App: In this app, we get courses using YouTube API we just need to provide the course (playlist) URL then we generate all videos in this playlist and anyone can start studying in this course .

Lost And Found: in this app, users can post a new post which contains the item they found and any one can view the post, and also there is an admin have the control to accept the post published and it contains monthly statistics we can get as an excel file.

48-hours: this an e-commerce app works in Palestine this app contains 3 dashboards seller, delivery and client.
